

## **The great partnership**

Science is a time series; religion is a Fourier transform.

Science can teach you some dance steps; reconnection is the dance.

Science empowers; religion relinquishes power.

Science shows you our house; religion shows you our home.

Science asks 'what is it made of?'; reconnection asks 'what is it?'

Atheism is a no-go theorem; faith is questioning the premise.

Science is good; religion says there is good.

Science thrills; religion challenges.

Science is the product of hope; religion is the channel of hope.

Religion says "let there be light"; science says "there is light".

Science has a generous instinct; religion is a generous instinct.

Science is about the notes; religion is about the key signature.

Science is learning to speak; reconnection is learning to see.

The opposite of faith is not doubt but fear.

[The above are all by Andrew Steane,

(<http://grievingturtle.com/2016/10/religion-is-a-fourier-transform>)

except the last which is from Philip Yancey, and the title is from the book by Jonathan Sacks.]
